Experience

- **Evizen AI Private Limited** *May 2026 - July 2026*
  Software Development Engineer Intern | Stress Testing | QA | Mobile Testing IIT Ropar
  – Owned quality assurance for Unilic, a proxy-proof classroom attendance app available on Google Play and the App Store.
  – Tested Android and iOS builds through functional and regression testing across successive releases.
  – Stress-tested attendance and verification workflows under concurrent classroom-scale usage and degraded conditions.
  – Identified and tracked defects through resolution, verified fixes, and supported release readiness for the pilot launch.
- **AWaDH - AI Vicharana Shala** *May 2024 - July 2024*
  Teaching Assisstant | AI-ML | Python IIT Ropar
  – Delivered sessions and assisted participants in understanding core concepts of ML, Linear Algebra and programming.
  – Contributed to front-end updates of the program's website.
  – Created comprehensive PDF notes for participants using LaTeX.

Projects

- **Convo** *Apr 2025 - Present*
  Real-Time Chat Application | MERN Stack | Socket.IO | Cloudinary **GitHub | Live Demo**
  – Built a full-stack real-time messaging platform supporting private/group chats, online presence, and read receipts.
  – Implemented JWT authentication, email verification, password reset, Google OAuth, and configurable privacy settings.
  – Integrated Convo AI with RAG-based app knowledge, contextual suggestions, and grounded responses using chat context.
  – Built advanced messaging features including replies, forwarding, and search, with media sharing powered by Cloudinary.
- **Ledgerly** *May 2025 - July 2025*
  Personal Finance Tracker | MERN Stack | Recharts **GitHub | Live Demo**
  – Built a secure full-stack personal finance platform with JWT authentication, Google sign-in, and protected routes.
  – Implemented budget management, spending warnings, recurring transactions, and savings goals with progress tracking.
  – Developed analytics dashboards with spending trends, category insights, search, and Recharts-based visualizations.
  – Implemented transaction filtering, data export, and a responsive interface using Tailwind CSS.
- **TradeScope** *May 2026 - Present*
  Trading and Portfolio Analytics Platform | MERN Stack | Recharts **GitHub**
  – Built a trading platform supporting simulated equities, futures, and options with private accounts and virtual portfolios.
  – Implemented advanced order execution with limit, stop orders, partial fills, price-time priority, and self-trade prevention.
  – Developed portfolio accounting and analytics for realized/unrealized P&L, cash ledgers, FX conversion, and trading journals.
  – Added risk controls including position limits, concentration warnings, daily-loss limits, and automated trading pauses.
